

Ins and Outs to Airport Safety

Have you ever wondered what all that stuff on an airport means? We learned in Private Pilot ground school that taxi lights are blue and red means stop, but there is allot more to airport layout and design then meet the eye. All the various hidden safety margins and features that are built into an airport are often taken for granted. Come join the folks from Armstrong Consultants, Inc as they give us a behind the scenes look at airport safety.

Directions: Commerative Air Force Hangar

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
